2022

# PORTUGAL 2030

- There are some funding lines under the P2030, which can allow access to financing with attractive interest rates and possibly even a lost share of fund financing.
- The main feature of these funds is to have a liquid job creation strand and develop the export potential of each of the companies.
- Through a multidisciplinary team, we structure the project, develop the market and economic study, present the application and then monitor the development of the implementation to maximize the response to Community funds.
